

BrewCrew Café Analysis

Objective:

Analyze sales patterns across seasons to optimize product offerings and maximize profitability.

Tools Used:

- Python (Data Analysis and Visualization)
 - Tableau (Interactive Visualization)
 - Data Source: "BrewCrew Café Dataset.xlsx"
-

Methodology:

- Analyzed seasonal trends across product categories
 - Calculated profit margins by season and channel
 - Created visualizations for pattern identification
 - Performed channel-specific analysis
-

Key Insights:

- **Seasonal Performance**
 - * Spring: Highest profitability (36.98% margin for Espresso).
 - * Summer: Strong Cold Brew performance (36.07% margin)
 - * Autumn: Consistent Pastries performance
 - * Winter: Stable across categories
 - **Wholesale vs Direct Customer Analysis**
 - **Wholesale Channel**
 - * Highest margins in Spring (Espresso: 36.98%, Pastries: 36.46%)
 - * Consistent performance in bulk orders
 - * Strong institutional relationships
 - **Direct Sales Channel**
 - * Peak performance in Summer (Cold Brew: 36.07%)
 - * Higher transaction frequency
 - * Seasonal sensitivity
 - **Product Portfolio Optimization**

Top Performing Combinations:

 1. Espresso (Spring, Wholesale): 36.98% margin
 2. Pastries (Spring, Wholesale): 36.46% margin
 3. Cold Brew (Summer, Direct): 36.07% margin
 4. Pastries (Autumn, Wholesale): 35.79% margin
 5. Pastries (Summer, Direct): 35.48% margin
-

Recommendations:

1. Seasonal Strategy
 - Spring: Focus on wholesale Espresso and Pastries
 - Summer: Promote Cold Brew in direct sales
 - Autumn/Winter: Maintain consistent product mix
 2. Channel Optimization
 - Strengthen wholesale partnerships for high-margin products
 - Develop seasonal direct sales promotions
 - Create channel-specific pricing strategies
 3. Consider bundling Cold Brew with seasonal promotions to increase visibility.
 - Develop seasonal menu variations
 - Consider bundle offerings
 - Optimize inventory based on seasonal demand
-
